

Arizona Combined Occupation Data File 2006-2008

This file combines data from the Arizona statewide occupation projections 2006-2008, occupational training requirements, and the 2006 occupational wage estimates into one spreadsheet. Combining these data sets in this format allows the user to readily see and compare the projected growth (or decline), average annual wage, and training requirements for 665 occupations in Arizona.

The first column (A) gives the Standard Occupational Classification (SOC) code. The next column (B) is the occupational title. The SOC organizes related occupations based on 23 major groups, starting with management occupations, then business and financial, next computer and mathematical, and so on. For more information on the SOC, see: www.bls.gov/soc/socguide.htm

Columns C and D show 2006 estimated and 2008 projected employment for each occupation. Columns E and F calculate the occupational employment changes numerically and as a percentage. This data shows which occupations will be in demand based on high projected growth. Column G lists the estimated average annual salary of the occupation. Annual salary is used instead of hourly because some occupations are not paid by the hour. The last column gives a brief description of general education and training requirements for the occupation. All of the data presented in this spread sheet should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

To further facilitate comparisons among occupations, the data is sorted in five different worksheets based on different data columns. In each worksheet the data is sorted, high to low, based on different criteria. The column in **bold print** is the basis for the sorting. The first sheet is the default sort, based on occupation code, and thus clustering similar occupations together as described in the Standard Occupational Classification system. The next worksheet sorts the occupations based on training and education requirements, starting with first professional degree, doctoral degree, master's degree, bachelor's, and so on down to occupations that generally require only short-term on the job training. As expected, higher education and training occupations generally have higher wages. There are some fluctuations in this trend, as some business and technical related occupations with bachelor's degrees pay more than some social service and teaching occupations with advanced degrees. This trend can be further seen in the third worksheet sorting occupations based on wage. There are of course exceptions to the trend, based on the nature of the occupation.

Worksheets four and five sort the occupations based on change (growth or decline). As can be seen by comparing these two sheets, occupations with the fastest growth (percentage change) are not necessarily the occupations with the most growth (numerical change). Because some of the more established occupations have a larger employment base to start with, those occupations will have more openings even though their growth rate may be slower than some of the faster growing, and newer, emerging occupations.

A blank cell in the spreadsheet means data not available or not releasable.

For more details on occupation wages and projections, see:
<http://www.workforce.az.gov/?PAGEID=67&SUBID=144>

Prepared by Arizona Dept of Economic Security, Research Administration in cooperation with the U.S. Dept of Labor, Bureau of Labor Statistics, October 2007.

Blank cell means data not available or not releasable.

The numbers presented should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

Totals may not add exactly due to rounding or suppression of data. Some occupations are not on this list due to insufficient data or confidentiality.

See Arizona Occupations Projections data file for more information on projections and methodology:

http://www.workforce.az.gov/admin/uploadedPublications/2584_AzOccProj06-08.xls

Wage data based on 2nd Quarter 2006 reference period. For more detailed wage data see:

http://www.workforce.az.gov/admin/uploadedPublications/2448_Arizona06.xls

Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

For technical notes on wage data see:

http://www.bls.gov/oes/current/oes_tec.htm

The training descriptions are provided as general guidelines and are not absolute requirements for employment.

Blank cell means data not available or not releasable.

The numbers presented should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

Totals may not add exactly due to rounding or suppression of data. Some occupations are not on this list due to insufficient data or confidentiality.

See Arizona Occupations Projections data file for more information on projections and methodology:

http://www.workforce.az.gov/admin/uploadedPublications/2584_AzOccProj06-08.xls

Wage data based on 2nd Quarter 2006 reference period. For more detailed wage data see:

http://www.workforce.az.gov/admin/uploadedPublications/2448_Arizona06.xls

Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

For technical notes on wage data see:

http://www.bls.gov/oes/current/oes_tec.htm

The training descriptions are provided as general guidelines and are not absolute requirements for employment.

Prepared by Arizona Dept of Economic Security, Research Administration in cooperation with the U.S. Dept of Labor, Bureau of Labor Statistics, October 2007.

Blank cell means data not available or not releasable.

The numbers presented should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

Totals may not add exactly due to rounding or suppression of data. Some occupations are not on this list due to insufficient data or confidentiality.

See Arizona Occupations Projections data file for more information on projections and methodology:

http://www.workforce.az.gov/admin/uploadedPublications/2584_AzOccProj06-08.xls

Wage data based on 2nd Quarter 2006 reference period. For more detailed wage data see:

http://www.workforce.az.gov/admin/uploadedPublications/2448_Arizona06.xls

Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

For technical notes on wage data see:

http://www.bls.gov/oes/current/oes_tec.htm

The training descriptions are provided as general guidelines and are not absolute requirements for employment.

Prepared by Arizona Dept of Economic Security, Research Administration in cooperation with the U.S. Dept of Labor, Bureau of Labor Statistics, October 2007.

Blank cell means data not available or not releasable.

The numbers presented should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

Totals may not add exactly due to rounding or suppression of data. Some occupations are not on this list due to insufficient data or confidentiality.

See Arizona Occupations Projections data file for more information on projections and methodology:

http://www.workforce.az.gov/admin/uploadedPublications/2584_AzOccProj06-08.xls

Wage data based on 2nd Quarter 2006 reference period. For more detailed wage data see:

http://www.workforce.az.gov/admin/uploadedPublications/2448_Arizona06.xls

Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

For technical notes on wage data see:

http://www.bls.gov/oes/current/oes_tec.htm

The training descriptions are provided as general guidelines and are not absolute requirements for employment.

Prepared by Arizona Dept of Economic Security, Research Administration in cooperation with the U.S. Dept of Labor, Bureau of Labor Statistics, October 2007.

Blank cell means data not available or not releasable.

The numbers presented should be viewed as indicators of relative magnitude and probable direction rather than absolute measures.

Totals may not add exactly due to rounding or suppression of data. Some occupations are not on this list due to insufficient data or confidentiality.

See Arizona Occupations Projections data file for more information on projections and methodology:

http://www.workforce.az.gov/admin/uploadedPublications/2584_AzOccProj06-08.xls

Wage data based on 2nd Quarter 2006 reference period. For more detailed wage data see:

http://www.workforce.az.gov/admin/uploadedPublications/2448_Arizona06.xls

Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

Hourly wage rates for occupations where workers typically work fewer than 2,080 hours per year are not available.

For technical notes on wage data see:

http://www.bls.gov/oes/current/oes_tec.htm

The training descriptions are provided as general guidelines and are not absolute requirements for employment.
